SUMMARY

Computer Science student in Houston, with three years of customer-facing work in high-volume restaurants. I build high-performance PCs for gaming and AI work, write games in Python, and work on my own car. Looking for a customer-facing role on a retail technology floor.

EXPERIENCE

YI PENG THAI DINING

SERVER | June 2023 – Present | Houston, TX

- Serve 15 to 20 tables a shift, tracking several orders at once without dropping details.
- Ask what each guest wants, recommend what fits, and give honest wait times.
- Learned the full menu to recommend add-ons and hit weekly sales targets.
- Enter every order into the POS system, which keeps kitchen errors and remakes down.

LIFE TIME FITNESS

LIFEGUARD | June 2022 – September 2022 | Friendswood, TX

- Watched over 100 swimmers a day and enforced every facility safety rule.
- Treated injured guests with first aid and CPR from the facility supplies.

WHATABURGER

TEAM MEMBER | June 2022 – September 2022 | League City, TX

- Held this and the Life Time lifeguard job through the same summer.

PROJECTS

ENTHUSIAST PC BUILDS

PERSONAL | 2025 – 2026

- Built three high-performance PCs from parts, for gaming and AI work, for myself, family, and friends.
- Pick parts to a budget, checking CPU, GPU, motherboard, and PSU compatibility before ordering.
- Assemble, flash BIOS, install Windows and drivers, then stress test and check thermals.
- Photos and full parts lists: [water-cooled RTX 4090](#), [HYTE Y70 with an RTX 5080](#), [RTX 4060 Ti](#).

INDIE GAME DESIGN

PERSONAL | 2025 – 2026

- [Destiny Dungeon](#): a Destiny 2 text RPG where a Llama 3.3 70B model runs the story, in about 1,400 lines of Python.
 - Signed players in to Bungie.net over OAuth 2.0, then built each turn's prompt from the game lore, the player's real character, and the chat history.
- [Asteroids](#): a playable clone in Python and Pygame, about 290 lines across 7 modules.
 - Made each rock split into two smaller, faster ones on a hit, until the pieces are too small to break.
