SUMMARY

Computer Science student at the University of Houston, graduating December 2026, with three years of customer-facing work in high-volume restaurants. I build enthusiast gaming PCs, write games in Python, and work on my own car. Looking for a customer-facing role on a retail technology floor.

EXPERIENCE

YI PENG THAI DINING

SERVER | June 2023 – Present | Houston, TX

- Serve 15 to 20 tables a shift, tracking several orders at once without dropping details.
- Ask what each guest wants, recommend what fits, and give honest wait times.
- Learned the full menu to recommend add-ons and hit weekly sales targets.
- Enter every order into the POS system, which keeps kitchen errors and remakes down.

CRAWFISH CAFÉ

HOSTESS / BUSSER | April 2023 – May 2023 | Houston, TX

- First point of contact for every guest. Gave honest wait times and set the tone for the visit.
- Planned seating assignments through peak hours to keep wait times down.

PROJECTS

ENTHUSIAST PC BUILDS

PERSONAL

- Build gaming PCs from parts, for myself, family, and friends.
- Pick parts to a budget, checking CPU, GPU, motherboard, and power supply compatibility before ordering.
- Assemble, flash BIOS, install Windows and drivers, then stress test and check thermals.

ASTEROIDS, A PYTHON GAME

PERSONAL | June 2025

- Built a playable Asteroids clone in Python and Pygame, about 290 lines across 7 modules.
- Wrote one base class for anything round, so the ship, rocks, and shots share collision code.
- Made each rock split into two smaller, faster ones on a hit, until the pieces are too small to break.
- Also wrote a [Tkinter tic-tac-toe](#) that builds its winning combinations from the board size, so the same code handles a 4×4 board.

ADDITIONAL EXPERIENCE

LIFE TIME FITNESS | LIFEGUARD June – September 2022 | Friendswood, TX

WHATABURGER | TEAM MEMBER June – September 2022 | League City, TX
